

DR. ROBERT NIELSEN

Practical Field Research fuels a Successful Extension Program

A successful field crops Extension program relies on the educational skills of the educator but is supported and sustained by a practical field research program that addresses crop management questions important to farmers' economic bottom line.

Time:

12PM

I am a Professor of Agronomy at Purdue University and the State Extension Corn Specialist for Indiana. My responsibilities are to conduct meaningful research on corn production and to extend the results of that research, as well as that of other researchers, to my Extension clientele throughout the state.
